DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to a process of making a structure, classified in class 438, subclass 738.
- II. Claims 36-51, drawn to a structure, classified in class 257, subclass 774.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the opening or via could have been formed by selective etching process involving dry or wet etching process. Furthermore, the processing temperature could have been made different from that of the indefinitely open claimed temperature range because the processing temperature is variable from a design to another.
